

## ABSTRACTS INDEX

### THEME I

#### PAGE 11

Psychology and non-human animals: an analysis of Brazilian scientific production  
CONCEA and Brazilian Legislation on Animal Experimentation: old and bad practices

#### PAGE 12

The possible conciliation between consequentialism and deontology for a critical interpretation of animal experimentation  
Attitudes of the use of nonhuman animals for research in the Bioscience Institute of UNESP Universidade Estadual Paulista, Botucatu, SP

#### PAGE 13

Discussion About Bioethics and Animal Use in Graduation  
Ethics and public politics of adoption of the substitutive techniques of the animal's use in science in Brazil

### THEME II

#### PAGE 14

Bioethics and research: course on alternative methods for postgraduate students  
Correlation of virulence factors production in vitro by *Candida* to pathogenicity in vivo experimental model of *Galleria mellonella*

#### PAGE 15

THE USE OF ANIMALS IN VETERINARY EDUCATION. A bioethical analysis  
Evaluation of the mutagenicity of butanolic and acetate extract of *Campomanesia lineatifolia*

#### PAGE 16

Use of synthetic models as alternative method for education and training on wildlife animal course  
Alternative methods: Discussing conceptions and practices in science education

#### PAGE 17

Alternatives to animal testing in the faculty of veterinary medicine of the Universidad Nacional Autonoma de Mexico  
Inexpensive homemade models for vascular access training in veterinary practice

#### PAGE 18

E-learning courses as powerful tools for Laboratory Animal Procedures training in Latin America  
Education and animal experimentation, ethics in higher education

#### PAGE 19

Rereading the use of animals in teaching and research by teachers at PUCRS from the formalization of the law Arouca:  
Subsidies for an appropriate action at CEUA/PUCRS  
Animals in education: Ethical Considerations And Substitutive Methods

#### PAGE 20

Investigation of field on the use of alternative methods by replacing animals in research and education  
Alternative/Surrogate methods to the use of living animals in the State University of Feira de Santana (UEFS): needs, acknowledgments and viability

#### PAGE 21

Which and how many animals are used?: About the (un)controlled use of animals for teaching purposes in the State University of Feira de Santana (UEFS), Bahia, Brazil  
Simulator applied to teaching veterinary surgical technique - asepsis and preparation of operative field

#### PAGE 22

The use of animals in researches and academic studies has been massively practiced, which follows science history. The indifference of many universities against the use of animals, treating them as simple didactic resources in order to achieve pedagogical  
Preparation of alternative teaching materials to be applied in the relation of teaching - learning in veterinary medicine

#### PAGE 23

Video edition software contributions to practical lessons on veterinary surgical techniques  
"Good Cell Culture Practices": a Theory and Practice Training Course initiative to ensure harmonization and standardization of laboratory procedures

**PAGE 24**

Mycoplasma detection: a necessary assay for quality control of cell cultures in alternative methods

**THEME III****PAGE 25**

Refinement of administration of injectable hormonal contraceptive in Wistar rats  
Simple and effective non-invasive methodology to assess the effects of sex steroid hormones in Wistar rats

**THEME IV****PAGE 26**

Hemolysis vs protein denaturation on the RBC assay to predict ocular irritation of surfactants  
Characterization of nanovesicles for in vitro toxicity assessment: role of aggregation state and chemical composition on the cellular response

**PAGE 27**

The reutilization of the rabbits used to prove biological products in the pyrogens test. An alternative for the animals reduction  
Development and validation of an immunochemical method for the determination of neutralizing antibodies of the component *Bothrops alternatus* in antivenom produced in Argentina. Mariconda, V.L1; Geoghegan, P.A.1

**PAGE 28**

Cuban experience on Monocyte Activation Test (MAT) for biological products  
Combination of erythrocyte and cell line-based methods as alternative to animal models for the evaluation of potential antioxidant ingredients for topical formulations

**PAGE 29**

Differential profile of Cyclosporine nephrotoxicity: PKC, PKA and p38 MAPK signaling involvement.  
In vivo acute toxicological studies of mangiferin

**PAGE 30**

Protective effects and repair effects of the green and black tea of *Camellia sinensis* on the genetic material of *Allium cepa* bioassay  
Antiproliferative potential of the white tea of *Camellia sinensis* in *Allium cepa* bioassay

**PAGE 31**

Pros and cons of allometric parity for biological models under the light of new experimental necessities  
Evaluation of in vitro cytotoxicity by different methodologies in samples submitted to extraction procedure

**PAGE 32**

REDUCTION OF ANIMALS USED TO DETERMINE MEDIUM LETHAL DOSE IN MURINE MODEL OF *Acinetobacter baumannii*  
The use of alternative methods for rabies diagnosis in Brazil

**PAGE 33**

Three-dimensional pellet culture of human chondroblasts and adipose mesenchymal stromal cells: an efficient method for differentiation assays and drug testing  
Correlation of Toxin Binding Inhibition test (ToBI) and the method of seroneutralization in mice: a promising alternative to the in vivo potency test

**PAGE 34**

Cytotoxic Evaluation of 4-nerolidylcatechol (4-NRC) and hydroxypropyl beta cyclodextrins (Hb-CD) complex  
Comparison between cytotoxicity and phototoxicity of Bergamot oil in human keratinocytes and Balb/c 3T3

**PAGE 35**

Two techniques validation to obtain suitable Langerhans cells for an immunocompetent three-dimensional human skin model  
Alternative methods to animal testing in the biological potency of rhEPO: Current situation

**PAGE 36**

EVALUATION of *Drimys brasiliensis* Miers ESSENTIAL OIL BY CYTOTOXICITY ALTERNATIVE METHOD  
EVALUATION OF CRYOPROTECTANTS IN Balb/c 3T3 CELLS

**PAGE 37**

Establishment of mixed cell cultures from the visual system of the crab *Ucides cordatus*  
In vitro assays evaluating the anticoagulation and antiplatelet effects of two diterpenes isolated from the algae *Dictyota menstrualis*

**PAGE 38**

Evaluation of 1,2,3 triazoles effects on platelet aggregation and coagulation through in vitro assays  
In vitro seroneutralization test to evaluate the potency of clostridial vaccines

**PAGE 39**

Maximum Reclaiming for Zoological Specimens in Search, Training and Disclosure  
New Feature for Preparing Educational Material in Entomology

**PAGE 40**

New Technique for Production Educational Materials in Internal Anatomy of Vertebrates: Emphasis on Durability, Resistance and Economy of Exemplary Used  
The use of the 3Rs in nutrition experiments: replace, reduce and refinement do not affect either results or quality

**PAGE 41**

Cytotoxicity & detachment evaluation of papain in fibroblasts murines  
Interaction of Gold Nanoparticle with Epithelial Cells an in vitro Lung Tissue-Equivalent Model

**PAGE 42**

Cell assays for stents evaluation: Safety margin and proliferative efficacy of the Ruthenium-NO donors coated stainless steel  
Development of a 3-D Atherosclerotic Vessel Model

**PAGE 43**

In vitro toxicity analysis of gold nanoparticles  
Obtention Of 3D Spheroidal Culture From Mc3t3-E1 Murine Pre-Osteoblastic Cells For Biocompatibility Studies

**PAGE 44**

Evaluation of solvents and controls for in vitro human cell-based neurotoxicological studies  
In vitro Assessment of Shampoos Eye Stinging Potential Using Transient Receptor Potential Vanilloid Type 1 (TRPV1)

**PAGE 45**

2/ A Mapping Based on Physico-chemical Features: Lessons Learned  
3/ Cutaneous Absorption on Reconstructed Human Epidermis (RhE): Guidance to the Choice of Solvent for Topical Application

**PAGE 46**

4/ Alternative Approaches for Skin Sensitization Evaluation: Statistical and Integrated Approach for the Combination of Non animal Methods  
5/ Human Reconstructed Tissues for the toxicology of the XXIth century

**PAGE 47**

6/ Methods Development Through Recognition in 3Rs : L'Oréal Commitment  
Cytotoxicity and Adhesion Studies of Osteoblast to Multifunctional Titanium Implant Surfaces

**PAGE 48**

Cytotoxic activity of Chitosan Films containing herbal substances  
Evaluation of the mutagenicity of butanolic and acetate extract of *Campomanesia lineatifolia*

**PAGE 49**

Establishment Of Tissue-Equivalent Model: 3d Structure From Prostate Cells Present In Vitro Characteristic Similar In Vivo  
3-D in vitro Model of human gastric cells in simulated microgravity of a NASA Bioreactor: a new model for Studying Epithelial Cells and *Helicobacter pylori* Interaction
